

**KAREN'S SHOE TREND:** Shoes... We love them, we need them, we collect them. Shoes complete our outfits. Sometimes, they make it! So, of course, there are trends to look out for when it comes to shoes.

In my previous post, I talked about three shoe trends for the upcoming fall/winter season: lace-up, all-over fur and colorblock.

Now, I'll finish with the last three trends. Let's dive right in... Shoes first!

**Skintight Sleek:** Made from latex or stretch leather, skintight boots are the eye-catching trend in boots this season! No matter the length, they're a popular choice among designers. If you're into a sleek look, the longer ones do give the illusion of leather pants. Tres chic!

**Frimly Fringe:** Fringed footwear is back! Now, where did we last see this? Oh, yes, Western-inspired wear and the 1970s! Well, no matter where you last spotted fringe, it's made its fashion revival with a modern twist.

**Unique Heels:** Who wants boring heels? If you do, then these shoes are not for you! Designers are keeping things interesting this season with quirky heels. From clear, Lucite block heels to unusual shapes, everyone's talking about out-of-the-ordinary, bold footwear.

Happy shoe shopping, everyone!
